Sana Choughule

Product Owner | Platform & Technical Products | Customer Experience

Mumbai, India | choughulesana@gmail.com | +91 7798274388 | linkedin.com/in/sana-choughule

PROFESSIONAL SUMMARY

Product and platform delivery professional with 4.5+ years of experience across financial services, logistics technology and airline revenue accounting. Experienced in translating business needs into functional requirements, user stories and acceptance criteria; supporting product discovery and backlog prioritization; and partnering with engineering, QA, data and business stakeholders to deliver platform capabilities and workflow improvements. Technical fluency in APIs, platform integrations, data flows and SQL, with hands-on Figma prototyping and experience developing 0-to-1 product concepts and AI-assisted workflow prototypes.

CORE SKILLS

Product Discovery, Problem Framing, Product Backlog Prioritization, Roadmap & Release Planning, Requirements Management, User Stories, Acceptance Criteria, Customer Journey Mapping, Feature Scoping, MVP Definition, Cross-functional Delivery, Stakeholder Alignment, Platform Capabilities, API & System Integrations, Data Workflows, Production Issue Analysis, Workflow Optimization, Prototyping, Design Handoff

PROFESSIONAL EXPERIENCE

Product Owner – Platform Delivery | J.P. Morgan Chase Bank, India Aug 2025 – Jan 2026

Financial Services

- Owned platform capabilities through requirement clarification, solution definition, validation and production delivery, coordinating business and engineering stakeholders across the delivery lifecycle.
- Translated business and functional needs into delivery requirements for platform capabilities and service workflows, improving clarity of scope and implementation expectations.
- Partnered with stakeholders and engineering teams to surface dependencies, security considerations and implementation trade-offs before delivery.
- Used production monitoring insights to identify platform performance issues and improvement opportunities, supporting reliability of secure financial workflows in a regulated environment.

Associate – Product & Platform Delivery | RXO Inc., Mumbai Feb 2023 – Aug 2025

Logistics Technology

- Translated stakeholder needs into functional requirements, user stories, acceptance criteria and Jira delivery workflows for logistics platform capabilities and integrations.
- Worked with business, engineering and QA teams to clarify feature scope, identify dependencies and align priorities across delivery activities.
- Evaluated improvement opportunities against business value, operational impact, implementation effort and technical feasibility to support backlog prioritization.
- Used operational feedback and recurring production issues to identify workflow friction and inform platform improvements.
- Contributed to platform and workflow improvements associated with an 8% increase in system efficiency.
- Supported platform integrations and workflow automation for logistics operations.

Associate – Product Delivery | Accelya Group, Mumbai Sep 2021 – Dec 2022

Airline Revenue Accounting

- Converted business requirements into delivery-ready functional changes for airline revenue accounting workflows, aligning business expectations with implementation needs.
- Collaborated with cross-functional teams on feature delivery, issue resolution and release readiness.
- Worked on system integrations and data workflows supporting airline revenue accounting processes.
- Investigated production issues to support service reliability, data accuracy and release quality.

SELECTED PRODUCT PROJECTS

PlanIt – 0-to-1 Product Concept | Discovery, Prototyping & MVP Definition

- Defined the problem hypothesis and target-user needs for an outing-planning experience using location, time, budget, mood and activity preferences as planning inputs.
- Mapped the core customer journey and prioritized MVP capabilities to focus the initial product scope.
- Created Figma screens, wireframes and user flows, and identified success measures including plan completion and engagement with recommendations.
- Designed a privacy-conscious concept using third-party booking links rather than in-app payments.

AI Portfolio Automation Agent – Photographer Portfolio Workflow | AI Product Prototype

- Identified repetitive portfolio-maintenance tasks for photographers and framed an AI-assisted workflow to reduce manual effort.
- Designed and prototyped a workflow that accepts Instagram Reel links or media uploads, organizes work into photographer-defined categories, generates metadata and updates portfolio grids.
- Specified user control over content placement and grid arrangement, balancing routine automation with creative control.

TOOLS & TECHNICAL SKILLS

Product & Documentation: Jira, Confluence, Notion, Postman
Design & Collaboration: Figma, Miro
AI Tools: ChatGPT, Claude, Cursor, Google AI Studio, Google Stitch, Google Antigravity
Cloud & Observability: AWS, Azure Functions, CI/CD, Splunk, Datadog, Dynatrace, Grafana
Technical: APIs, Platform Integrations, Data Workflows, SQL

EDUCATION & CERTIFICATIONS

Bachelor of Engineering, Information Technology | University of Mumbai | 2017 – 2021

- AWS Certified Cloud Practitioner
- IBM Enterprise Design Thinking Practitioner
- AWS Generative AI Learning Plan
